

# Arctera™ Enterprise Vault Version Comparison

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
<b>Core Enhancements</b>								
Optical Character Recognition (OCR) Image Conversion	✓	✓	✓	✓	✓	✓	✓	Ability to recognize and index text in images that are stored in Enterprise Vault archives. You can search for text in scanned documents, forms, faxes, or screenshots, after they are archived.
Records Management	✓	✓	✓	✓	✓	✓	✓	Allows you to mark selected items such as records, conduct searches for these records, and export them for transfer elsewhere. Fulfils the requirements of Capstone (US government standard).
Enterprise Vault Index Dashboard	✓	✓	✓	✓	✓	✓	✓	A web-based solution that reflects the current state of Enterprise Vault indexing at a granular level that will help an administrator take action on unhealthy indexes in a timely manner. It helps Enterprise Vault administrators overcome the challenges that they face daily with the indexing service.
PowerShell support for Index Management	✓	✓	✓	✓	✓	✓	✓	New PowerShell cmdlet is introduced to Manage Indexes. Rebuild, upgrade, sync, and verification of indexes can be performed using the new PowerShell cmdlet. The new cmdlet supports legacy and Elasticsearch indexes.
PowerShell cmdlet for Creating New Archives		✓	✓	✓	✓	✓	✓	A new PSH cmdlet to create new archives and update existing archives. Useful cmdlet when a large number of SMTP archives are to be created.
PowerShell cmdlet for Migration of Indexes				✓	✓	✓	✓	Utilizing the new PowerShell cmdlet, it is possible to decommission old servers and consolidate indexes from multiple old servers onto fewer new servers.
Enterprise Vault (EV) Usage Analyzer					✓	✓	✓	EV Usage Analyzer is a utility that reports entitled vs. actual license usage.
Journal Report						✓	✓	The journal report allows users to reconcile the data sent by a source and received by Enterprise Vault.
<b>Security (Role Based Access, Authentication, and Authorization)</b>								
Single Sign-On for Enterprise Vault Search	✓	✓	✓	✓	✓	✓	✓	Enterprise Vault supports Single sign-on (SSO) authentication for Enterprise Vault Search using Security Assertion Markup Language (SAML) 2.0 compliant Identity Providers (IdP).
Multi-Factor Authentication Support for Enterprise Vault Search Desktop		✓	✓	✓	✓	✓	✓	Configure desktop-based Enterprise Vault search with SSO and MFA for ease of access with highest standards of security.
Enhanced Role-Based Access		✓	✓	✓	✓	✓	✓	With Enterprise Vault 14.3, all day-to-day operations can be performed using a non-vault service account. The root account will be required only for mission-critical operations such as upgrade, adding of new server, or removing existing server.
Read-Only Role				✓	✓	✓	✓	The new read-only role has minimum permissions to monitor only settings and task progress in the Enterprise Vault administration console. The new role can be assigned to users who are not permitted to modify Enterprise Vault settings.

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
Domino Time-Based One-Time Password					✓	✓	✓	Support for HCL Domino native Single Sign On for Enterprise Vault Domino Search.
Non-Interactive Service Account					✓	✓	✓	Vault Service Account can now be configured as non-interactive to restrict usage of the service account.
Privilege Account Management - BeyondTrust					✓	✓	✓	Rotate Vault Service Account credentials using BeyondTrust PasswordSafe solution.
Privilege Account Management - CyberArk						✓	✓	Rotate Vault Service Account credentials using CyberArk CPM.
Support for Kerberos							✓	Enterprise Vault now supports Kerberos for communication with eDiscovery and Surveillance.
Elasticsearch Indexing Engine								
Elasticsearch Index Engine	✓	✓	✓	✓	✓	✓	✓	Enterprise Vault with Elasticsearch delivers faster indexing and search performance. The new index engine offers memory and storage optimization.
PowerShell support for Elasticsearch Index Snapshot Management	✓	✓	✓	✓	✓	✓	✓	10+ PowerShell cmdlets are shipped in Enterprise Vault 14.2 for snapshot management of Elasticsearch indexes.
Proximity Search		✓	✓	✓	✓	✓	✓	Support for proximity search operators such as NEAR, BEFORE, and NOTWITHIN for precise search results.
Elasticsearch Index Snapshot Management			✓	✓	✓	✓	✓	This feature allows users to adjust the retention and expiration of Elasticsearch index snapshots so that they do not exceed 500 snapshots nor run out of disc capacity for snapshot storage.
Elasticsearch Multi Data Path					✓	✓	✓	With Enterprise Vault 15.0 and above, multiple Elasticsearch index locations can be configured for efficient storage management and to avoid a single point of failure.
Microsoft Applications								
Microsoft Teams Collection	✓	✓	✓	✓	✓	✓	✓	Configuration of Microsoft Teams is now available in the Enterprise Vault admin console. New nodes are introduced in the admin console to configure targets, connections, policies, and archives.
Microsoft Purview Information Protection			✓	✓	✓	✓	✓	With version 14.4, Enterprise Vault can decrypt Microsoft Purview Information Protection Protection-encrypted emails. Enterprise Vault can decrypt and index encrypted attachments alongside top-level messages. Content that has been decrypted can be used for eDiscovery and compliance searches.
SharePoint Subscription Edition				✓	✓	✓	✓	Enterprise Vault now supports the new SharePoint Subscription Edition. Choose the licensing model that suits your requirement.
Support for Microsoft 365 on Enterprise Vault Server				✓	✓	✓	✓	With Enterprise Vault 14.5, customers can utilize Microsoft 365 Outlook, which facilitates the standardization of Microsoft 365 Outlook throughout their organization.
Support for Microsoft Edge				✓	✓	✓	✓	Enterprise Vault now utilizes Microsoft Edge for rendering Enterprise Vault search in Outlook integrated mode, allowing customers to completely remove Internet Explorer from their environment.

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
<b>Flexible Deployment</b>								
Azure Cloud Storage with Native Services	✓	✓	✓	✓	✓	✓	✓	Support for Azure cloud native services: <ul style="list-style-type: none"><li>• Blob as primary storage</li><li>• Azure GovCloud</li></ul>
AWS Cloud Native Services	✓	✓	✓	✓	✓	✓	✓	Support for AWS cloud native services: <ul style="list-style-type: none"><li>• S3 as primary storage</li><li>• Encryption</li><li>• IAM Role</li><li>• AWS GovCloud</li></ul>
	✓	✓	✓	✓	✓	✓	✓	• S3 Object Lock (WORM) – Immutable storage <ul style="list-style-type: none"><li>• S3 Intelligent Tiering – Storage lifecycle based on access pattern</li></ul>
		✓	✓	✓	✓	✓	✓	AWS S3 PrivateLink – Archived data flows through a secured channel instead of a public network.
			✓	✓	✓	✓	✓	• Support for AWS S3 Glacier Instant Retrieval as primary as secondary storage <ul style="list-style-type: none"><li>• Best suited for use cases involving long-term retention with rare time time-bound retrievals</li></ul>
WORM for S3 Generic Connector	✓	✓	✓	✓	✓	✓	✓	Support for archiving data on S3-compliant storage with Object Lock enabled.
Google Cloud Storage		✓	✓	✓	✓	✓	✓	Google Cloud Storage as a primary storage for Enterprise Vault archived data.
Azure Blob WORM Storage						✓	✓	Support for WORM storage ensures that archived data remains tamper-proof.
<b>Arctera Insight Classification</b>								
Classification	✓	✓	✓	✓	✓	✓	✓	A framework that allows for automatic classification, metadata tagging, and records identification – facilitating search, discovery, supervision, and many other activities.
Arctera Information Classifier Support	✓	✓	✓	✓	✓	✓	✓	Support for our next next-gen classification engine with hundreds of built-in policies and patterns to make informed decisions around retention period, storage tier, discovery, supervision, etc.
Classification Enhancements: PII	✓	✓	✓	✓	✓	✓	✓	New policies for CCPA and personal data detection for Brazil, Croatia, Iceland, Russia, South Africa and Ukraine. New policies for personal data detection for Argentina, China, Hong Kong, India, Mexico, and United Arab Emirates.
Classification Enhancements: COVID-19 and Ransomware Policies	✓	✓	✓	✓	✓	✓	✓	New classification policies for helping users tag COVID-related and ransomware content.
Workplace Harassment Policy	✓	✓	✓	✓	✓	✓	✓	Workplace harassment policy to classify data that could be related to bullying or sexual harassment.
Arctera Information Classifier – FIPS 140-2 Compliant	✓	✓	✓	✓	✓	✓	✓	Arctera Information Classifier 2.4.0 is Federal Information Processing Standards (FIPS) 140-2 compliant and meets the security requirements for cryptographic modules.
Sentiment Analysis	✓	✓	✓	✓	✓	✓	✓	Sentiment Analysis score can be used for Supervision to filter items with negative sentiments. For example, how employees are reacting to the latest appraisals or change in HR policies etc.
Anti-Money Laundering (AML) Policy V2	✓	✓	✓	✓	✓	✓	✓	The Anti-Money Laundering (AML) Policy V2 can be used to aid in meeting compliance obligations for financial supervision in banking.

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
Material Non-Public Information (MNPI) Policy V2	✓	✓	✓	✓	✓	✓	✓	The Material Non-Public Information (MNPI) Policy V2 can be used to aid in meeting compliance obligations for financial supervision in banking.
United States Data Protection Law				✓	✓	✓	✓	New policies help customers classify data to classify data to comply with United States Data Protection laws such as UCPA, CDPA, CPA, and VCDPA.
Policies for Medical Diagnosis				✓	✓	✓	✓	New policies to identify content related to medical diagnosis are introduced in Enterprise Vault 14.5.
<b>Arctera Insight eDiscovery</b>								
Legal Holds	✓	✓	✓	✓	✓	✓	✓	Search, preserve, and initiate legal holds on archived data.
Restricted Searches	✓	✓	✓	✓	✓	✓	✓	In Insight eDiscovery, you can now restrict the searches to access information specific to the departments in Compliance Accelerator.
Export to PST Enhancements	✓	✓	✓	✓	✓	✓	✓	Conversion of EML to MSG.
Export to NSF Enhancements	✓	✓	✓	✓	✓	✓	✓	Insight eDiscovery allows NSF rollover while exporting Domino items into NSF files. An administrator can configure the size of the NSF file in MB beyond which it will be rolled over. The maximum size for rollover is 65,535 MB.
Rich Native View of MS Teams Content	✓	✓	✓	✓	✓	✓	✓	Search and review MS Teams content in its rich native view form. View all the edits, reactions, and emojis that are part of the Teams chat.
Proximity Search		✓	✓	✓	✓	✓	✓	Support for proximity search operators such as NEAR and BEFORE precise discovery results.
Sentiment Score-Based Searches		✓	✓	✓	✓	✓	✓	Leverage Arctera Insight Classification sentiment score to perform discovery searches.
Search Optimization			✓	✓	✓	✓	✓	With search optimization, you can anticipate faster searches when the search is conducted on Elasticsearch indexes and when the number of hits exceeds 10,000.
Auditing			✓	✓	✓	✓	✓	Auditing in Insight eDiscovery enables you to configure, capture, search, and export all client client-side modifications. Each audit record includes information such as what changed, who changed it, the previous value, and the new value.

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
<b>Arctera Insight Surveillance</b>								
Hotword Analysis	✓	✓	✓	✓	✓	✓	✓	<ul style="list-style-type: none"> <li>• Filter items based on existing hotwords and hotword sets.</li> <li>• View count of hotwords found within each item.</li> <li>• View hotword statistics found in the selected item, including the count of the hotword based on the location.</li> </ul>
Escalation Review Enhancements	✓	✓	✓	✓	✓	✓	✓	Reviewers now must add a mandatory comment before escalating any message, providing context about the reason for the escalation.
Arctera Insight Surveillance	✓	✓	✓	✓	✓	✓	✓	A new full full-featured Advanced Supervision solution offered on Enterprise Vault and Arctera Insight Archiving.
Search Preview	✓	✓	✓	✓	✓	✓	✓	Preview of department-level search results before accepting/rejecting them.
Filter on Author and Subject	✓	✓	✓	✓	✓	✓	✓	Filtering review items based on author or subject criteria.
Simplified Searching of Monitored Employees	✓	✓	✓	✓	✓	✓	✓	Searching and selection of monitored employees in a department while creating search.
Auditing	✓	✓	✓	✓	✓	✓	✓	Capture all the changes made in the Insight Surveillance client. Search and export the audit entries for reporting.
Custom Search Attributes	✓	✓	✓	✓	✓	✓	✓	Search on custom index properties is now possible in the new version of the supervision client.
Proximity Search		✓	✓	✓	✓	✓	✓	Support for proximity search operators such as NEAR and BEFORE for precise sampling and supervision searches.
Intelligent Review (IR) 2.0		✓	✓	✓	✓	✓	✓	Machine learning-based review of content. IR 2.0 evaluates item's content along with its metadata. Option to highlight and add content to aid learning. Expedited supervision reviews with better accuracy.
Classification Hit Highlighting		✓	✓	✓	✓	✓	✓	Hit Highlighting of keywords or phrases that triggered classification.
Sentiment Score-Based Searches		✓	✓	✓	✓	✓	✓	Leverage Arctera Insight Classification sentiment score to perform sampling and supervision searches.
Intelligent Review Transparency			✓	✓	✓	✓	✓	Transparency regarding the relevance or irrelevance of an item marked by Intelligent Review algorithm. Single pane containing information on the degree of relevance of the processed items. Provides details of top contributing factors behind the relevancy score of each item.
Search Optimization			✓	✓	✓	✓	✓	With search optimization, you can anticipate faster searches when the search is conducted on Elasticsearch indexes and when the number of hits exceeds 10,000.
Microsoft Teams Sampling				✓	✓	✓	✓	Guaranteed and random search sampling of Microsoft Teams Chat and Channel is now available in Insight Surveillance.
Sentiment Score-Based Surveillance				✓	✓	✓	✓	Sentiment score score-based searches and sampling allows customers to reduce noise and find relevant content in quick time. Facet filtering and sorting on the quick time. Facet filtering and sorting on the sentiment score helps to focus on items with extreme score and ignore the ones that have neutral score.
API-Based Reporting					✓	✓	✓	New API-based framework for Insight Surveillance reporting.
Labels					✓	✓	✓	Labels to filter and categorize items for faster reviews.

Feature	14.2	14.3	14.4	14.5	15.0	15.1	15.2	Feature Notes
Release Date	Dec 2021	Sept 2022	March 2023	Sept 2023	March 2024	Sept 2024	July 2025	
<b>Usability and Reporting</b>								
Analytics Connector	✓	✓	✓	✓	✓	✓	✓	Provides third-party applications with Enterprise Vault index metadata – useful for analytics and machine learning applications.
New OData Reports	✓	✓	✓	✓	✓	✓	✓	New reports show the count of items based on the classification policy applied, and information on hotword statistics for items that were flagged by hotword hits.
Custom Message Types	✓	✓	✓	✓	✓	✓	✓	Search for, export, and create reports for items based on selected message types.
Hit Highlighting Navigation	✓	✓	✓	✓	✓	✓	✓	Navigate between highlighted search terms within an item. In case of multiple search keywords, you can choose the keyword that you want to highlight and navigate on.
Time-Based Searches	✓	✓	✓	✓	✓	✓	✓	The Date range section now includes time controls in the From and To fields that allow you to specify the time, along with the date, to further refine the search.
Search Classification Tags	✓	✓	✓	✓	✓	✓	✓	In addition to selecting a tag value from the dropdown, you can now type in the tag value to perform a search.
SMTP Server Certificate Settings	✓	✓	✓	✓	✓	✓	✓	Configure connection security settings at the SMTP server-level, which override the site site-level settings.
Power BI Templates for OData reports	✓	✓	✓	✓	✓	✓	✓	New Power BI templates that you can use to connect to the OData web services and generate detailed reports.
